## SUMMARY

Senior Software Engineer with 5+ years shipping production systems in Python, Go, AI/LLM workflows, and DevOps. Primary focus is full-time product engineering; selective consulting and AI/backend side work run in parallel without impacting full-time delivery. Builds scalable backends, embeds LLMs/NLP into products, automates infrastructure with Ansible and CI/CD, and ships AI-assisted development workflows across Django, Streamlit, n8n, and cloud deployments. Fluent in English and Persian; Master's degree in Artificial Intelligence.

## EXPERIENCE

**Senior Software Engineer** Jul 2023 - Present

Neurocage Systems LTD | Full-time · Remote | Montreal, Canada

- Deliver embedded and backend software focused on reliability, hardware integration, and production stability across multi-team releases.
- Design AI analytics agents and visualization workflows that turn operational data into actionable insights for product stakeholders.
- Own Django management panels, device-to-cloud integrations, and CI/CD pipelines that accelerate safe testing and deployment.

**Software Team Lead | Backend, AI Systems & DevOps** Sep 2024 - Present

Ai Run | Self-employed · On-site | Iran

- Lead architecture and delivery of Python (Django) and Go backends for AI-driven apps; set coding standards and run reviews.
- Spearhead LLM/automation integrations and real-time services (WebSockets); own Docker, Traefik/Nginx, SSL, DNS, and CI/CD.
- Mentor developers and align engineering roadmaps with product goals for reliable production releases.

**Technical Consultant** Jun 2025 - Present
