01 PROFESSIONAL SUMMARY

Hands-on Principal/Senior Software Engineer and Technical Team Lead with 5+ years shipping backend, AI, and platform systems while mentoring teams. Full-time engineering leadership is the primary commitment; advisory and AI/platform side work are scoped around that core role without competing with delivery. Owns architecture for high-concurrency services (Go/Redis), real-time communication (WebSockets), high-volume event analytics (ClickHouse), and LLM/NLP product workflows. Drawn to scalable real-time backends, live-ops infrastructure, and AI for interactive, high-throughput products. Fluent in English and Persian; Master's degree in AI.
