SUMMARY

Senior Software Engineer with 5+ years shipping production systems in Python, Go, AI/LLM workflows, and DevOps. Primary focus is full-time product engineering; selective consulting and AI/backend side work run in parallel without impacting full-time delivery. Builds high-concurrency backends, real-time communication (WebSockets), and high-volume event analytics (ClickHouse/Redis), and embeds LLMs/NLP into products with Ansible/CI/CD automation. Interested in scalable real-time backends, live-ops infrastructure, and AI for interactive, high-throughput products. Fluent in English and Persian; Master's degree in Artificial Intelligence.

EXPERIENCE

Senior Software Engineer Jul 2023 - Present

Neurocage Systems LTD | Full-time · Remote | Remote

- Deliver embedded and backend software focused on reliability, hardware integration, and production stability across multi-team releases.
- Design AI analytics agents and visualization workflows over operational/event data for faster product decisions.
- Own Django management panels, device-to-cloud integrations, and CI/CD pipelines that accelerate safe releases.

Software Team Lead | Backend, AI Systems & DevOps Sep 2024 - Present

Ai Run | Self-employed · On-site | Karaj

- Lead high-concurrency Python (Django) and Go backends with Redis; set standards and run code reviews.
- Ship real-time communication (WebSockets) and LLM/automation pipelines; own Docker, Traefik/Nginx, SSL, DNS, and CI/CD.
- Mentor developers and align roadmaps for reliable live production releases.

Technical Consultant Jun 2025 - Present

Acticomp | Contract · Hybrid | Karaj
